

# Package: pluscode (via r-universe)

September 12, 2024

**Type** Package

**Title** Encoder for Google 'Pluscodes'

**Version** 0.1.0

**Author** Michael Doyle

**Maintainer** Michael Doyle <michaeledoyle7@gmail.com>

**Description** Retrieves a 'pluscode' by inputting latitude and longitude. Includes additional functions to retrieve neighbouring 'pluscodes'.

**License** GPL-2

**LazyData** FALSE

**Imports** httr, jsonlite

**RoxygenNote** 5.0.1

**NeedsCompilation** no

**Date/Publication** 2018-11-14 15:00:03 UTC

**Repository** <https://doylem86.r-universe.dev>

**RemoteUrl** <https://github.com/cran/pluscode>

**RemoteRef** HEAD

**RemoteSha** fc86c575089c7c605e2e54608204d108202542ad

---

`pluscode_eastneighbour`*Pluscode East Neighbour*

---

**Description**

This package retrieves the easterly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

**Usage**

```
pluscode_eastneighbour(pluscode)
```

**Arguments**

<code>pluscode</code>	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
-----------------------	--

**Examples**

```
pluscode_eastneighbour("9C4MGC2M+H4")
```

---

`pluscode_encode`*Pluscode Encoder*

---

**Description**

This package retrieves a pluscode by inputting latitude and longitude

**Usage**

```
pluscode_encode(lats, lngs, precision)
```

**Arguments**

<code>lats</code>	A valid latitude within the range -90 to 90
<code>lngs</code>	A valid longitude within the range -180 to 180
<code>precision</code>	Options are 2, 4, 8, or 10

**Examples**

```
pluscode_encode(52.501450, -6.567180, 8)
```

---

pluscode\_neighbours    *Pluscode Neighbours*

---

**Description**

This function retrieves the neighbouring pluscodes of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

**Usage**

```
pluscode_neighbours(pluscode)
```

**Arguments**

pluscode            A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)

**Examples**

```
pluscode_neighbours("9C4MGC2M+H4")
```

---

pluscode\_northeastneighbour  
                          *Pluscode Northeast Neighbour*

---

**Description**

This package retrieves the north-easterly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

**Usage**

```
pluscode_northeastneighbour(pluscode)
```

**Arguments**

pluscode            A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)

**Examples**

```
pluscode_northeastneighbour("9C4MGC2M+H4")
```

pluscode\_northneighbour

*Pluscode North Neighbour*

---

### **Description**

This package retrieves the northerly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

### **Usage**

```
pluscode_northneighbour(pluscode)
```

### **Arguments**

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

### **Examples**

```
pluscode_northneighbour("9C4MGC2M+H4")
```

---

pluscode\_northwestneighbour

*Pluscode Northwest Neighbour*

---

### **Description**

This package retrieves the north-westerly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

### **Usage**

```
pluscode_northwestneighbour(pluscode)
```

### **Arguments**

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

### **Examples**

```
pluscode_northwestneighbour("9C4MGC2M+H4")
```

---

pluscode\_southeastneighbour  
*Pluscode Southeast Neighbour*

---

### Description

This package retrieves the south-easterly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

### Usage

```
pluscode_southeastneighbour(pluscode)
```

### Arguments

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

### Examples

```
pluscode_southeastneighbour("9C4MGC2M+H4")
```

---

pluscode\_southneighbour  
*Pluscode South Neighbour*

---

### Description

This package retrieves the southerly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

### Usage

```
pluscode_southneighbour(pluscode)
```

### Arguments

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

### Examples

```
pluscode_southneighbour("9C4MGC2M+H4")
```

pluscode\_southwestneighbour  
*Pluscode Southwest Neighbour*

---

**Description**

This package retrieves the south-westerly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

**Usage**

```
pluscode_southwestneighbour(pluscode)
```

**Arguments**

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

**Examples**

```
pluscode_southwestneighbour("9C4MGC2M+H4")
```

---

pluscode\_westneighbour  
*Pluscode West Neighbour*

---

**Description**

This package retrieves the westerly neighbour of a valid pluscode, with a precision of 2, 4, 8, or 10 excluding the plus sign (which can be included)

**Usage**

```
pluscode_westneighbour(pluscode)
```

**Arguments**

pluscode	A valid pluscode 2, 4, 8, or 10 characters in length excluding the plus sign (which can be included)
----------	--

**Examples**

```
pluscode_westneighbour("9C4MGC2M+H4")
```
